IMPORTANT WARNING

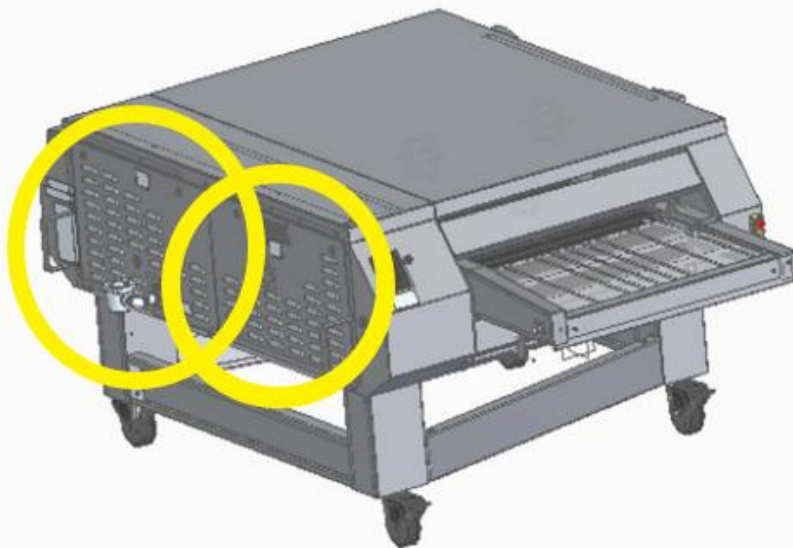

- WARNING! THIS PROCEDURE MUST BE DONE WHILE THE OVEN ALLIMENTATION IS OFF. BE VERY CAREFUL NOT TO HURT YOURSELF OR DAMAGE THE EQUIPMENT!

1 Turn off the oven alimention

Turn off the oven alimention by pushing the button on the side of the oven.

2 Accessing the electrical panel

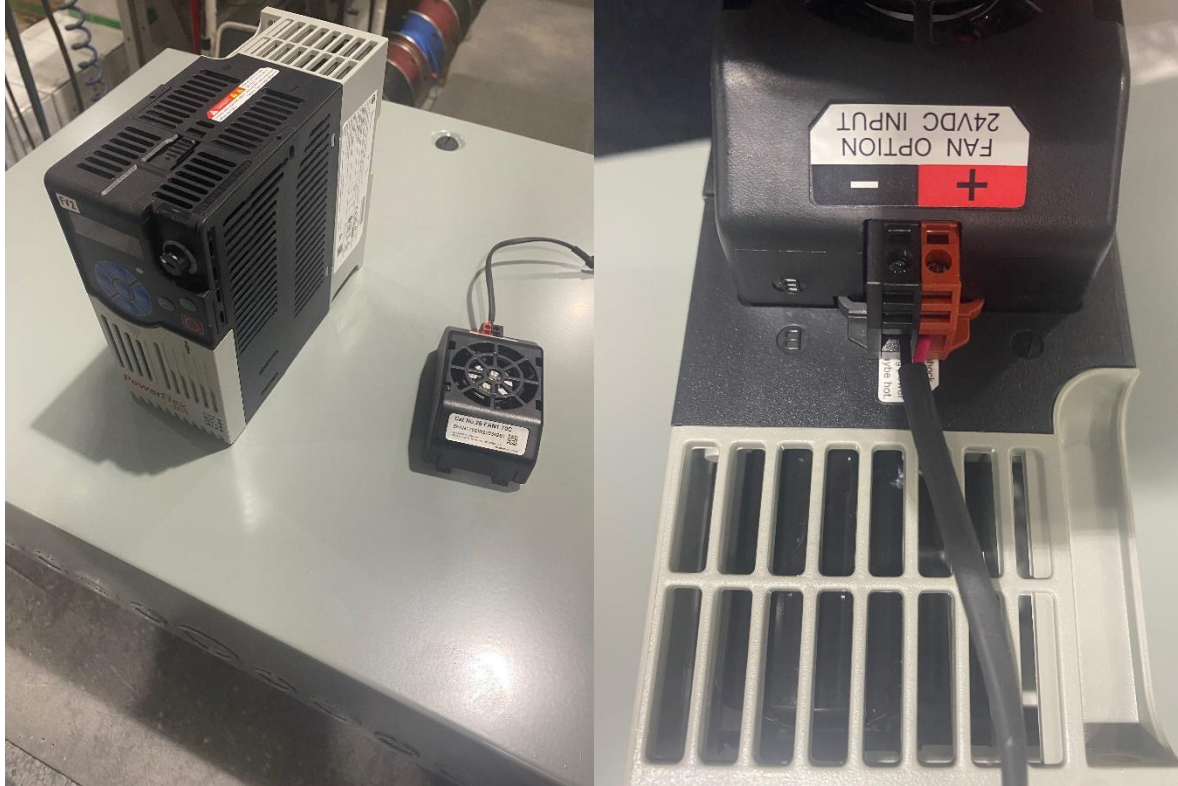

Take off both panel.

3 Position the fan

(take in consideration that the driver is in the oven)

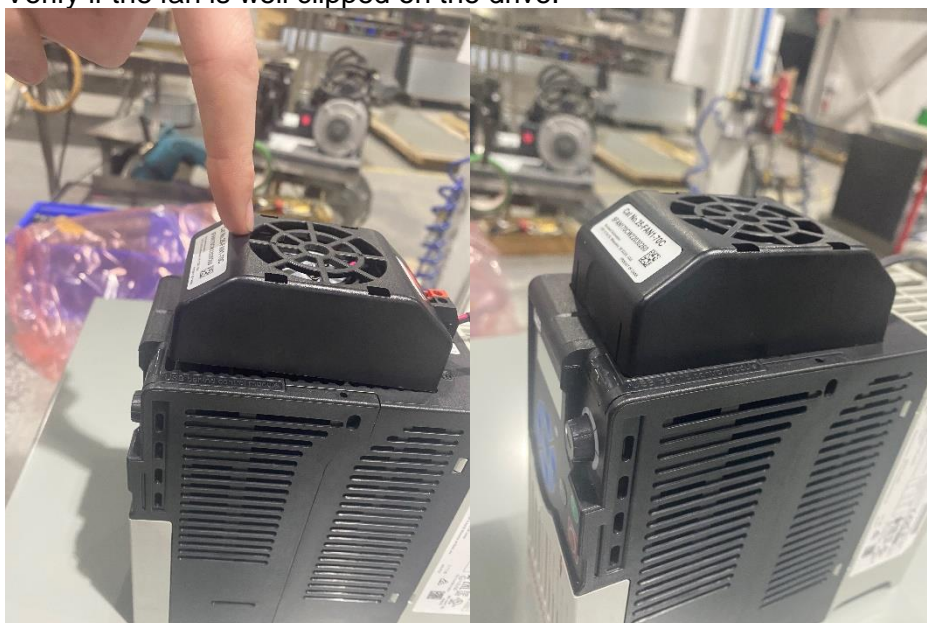

Install the fan on the top of the driver, as shown on the 2 pictures.

4 Verify the good fixation

(take in consideration that the driver is in the oven)

Verify if the fan is well clipped on the drive.

5 Make the connection

(take in consideration that the driver is in the oven)

Connect the alimentation cable to the power supply (DC 24V/1.6A) as shown on the 2 pictures.

(you should place the cables with tie raps with the others cables already present on the electrical panel)

6 Close all panel

Reinstall all the panel that were remove for the operation.
